

INTERNSHIP PROJECT PROPOSAL & ROADMAP

PROJECT PROPOSAL SUBMISSION DEADLINE: JULY 19, 2026

1. Intern Profile

Full Name:	Muhammad Faizan Ali
Internship ID:	ZYNVEX-CERT-0673
Program:	ZYNVEX-CERT-0673

2. Proposed Project

Project Title:	Enterprise Incident Management and Monitoring System
----------------	--

3. Project Overview (Detailed)

This project aims to build a comprehensive Incident Management System designed to track, categorize, and resolve technical issues within an organization. The system will feature a modern, responsive web dashboard built with React for real-time visualization of active incidents, while JavaFX will be utilized for a robust desktop administration client for advanced configuration and deep-dive analytics. The SQL backend will manage high-volume data, ensuring ACID compliance for critical incident logging, status updates, and user access control
--

4. Technology Stack (Tools and Technologies)

Frontend / UI Frameworks:	React (web dashboard), JavaFX (desktop admin client)
Backend / Database APIs:	SQL (MySQL/PostgreSQL), Java/Spring Boot (for backend integration)
Other Tools / Deployment Platforms:	GitHub (version control), Maven (dependency management)

5. Project Roadmap (4 Modules)

You need to divide your project into 4 phases. Type your specific deliverables inside the empty boxes below. Ensure they align with the fixed module timelines:

Phase / Module	Deadline Date	Your Specific Deliverables
Module 1	July 20 - July 26, 2026	Database schema design (SQL), initial setup of React frontend structure, and user authentication module.
Module 2	July 27 - Aug 02, 2026	Incident logging and reporting forms in React; backend API integration for CRUD operations.
Module 3	Aug 03 - Aug 09, 2026	Development of JavaFX admin desktop client for incident status escalation and historical analytics.
Module 4	Aug 10 - Aug 15, 2026	System testing, final bug fixes, comprehensive documentation, and repository cleanup for final submission.

6. Reporting Rules & Final Submission

- **Weekly Progress Submission:** Every weekend, you must submit your current progress report. This report must include your active GitHub repository link and an updated README.md file matching only the exact work you have successfully completed during that week's module timeline.
- **Final Project Submission Deadline:** August 15, 2026. This is the absolute final submission date for your completed project, final production deployments, clean source code repository, and comprehensive system documentation.
